

Dear Sirs,
I should have the right to choose what I want to listen to, when I want to listen to it. I watch my local weather on the weather channel on cable NOT broadcast TV, don't try and take that away either!

If you want to really do something go back in time and put a limit on advertising lengths and frequency on braodcast TV and radio. Limit the number of stations one company can own in a market? Congress you were bought out a long time ago.

In a free market place the cream rises to the top, there are more choices than ever and the big companies are making more money that ever.

I am willing to pay for service to get away from the advertising mess broadcast radio has become. Taking traffic away from XM and Sirius will not fix broadcast radio.

Steve H.
